Technical Profile

- HTML
- CSS
- Bootstrap
- LUA
- Unreal Engine
- MS Office
- JavaScript
- C#
- SQL
- AWS

Competencies

- Problem solving
- Self-management
- Result Oriented
- Teamwork
- Commercial Awareness
- Flexible

Interests

- Mountain biking
- Video games
- European football
- Web design

Summary

Achieved an associate degree in software development at College of Western Idaho. Focusing on programming languages, communicating with other creative members, and faced with difficult problem-solving tasks. Strong understanding of web design, Microsoft Office Suite, and other valuable programming languages and skills.

Professional Experience

Pipe Detailer 2018-now Western Waterworks Supply, Nampa, ID

Used AutoCAD software to create 3D pipe layouts from contract drawings for fabrication across western United States. I used Excel spreadsheets to create organized graphics for supply orders for the company. This allowed me to collaborate with co-workers on a large scale on multi-million-dollar operations across western United States.

Programming Intern Fall 2023 Western Waterworks Supply, Nampa, ID

I reached out to Western Waterworks Supply about helping me satisfy my software development internship credit. I spent the semester coding in C# using AutoCAD API to automate some processes when working with pipe. The program was developed in collaboration with the drafting department to reach the desired product.

Education

AAS in Software Development 2020-2023 College of Western Idaho, Boise, ID

GPA: 4.0 (on a scale of 4.0)
Software Development AAS
